Dominican Medical Association IX Medical Symposium

Honoring Carmen Lazala , M.D. and Pedro Aponte, M.D.

Sunday May 1st, 2011

Program Description & Objectives

The conference will be comprised of a variety of prevailing and notable topics in the area of psychiatry, neurology, internal medicine, oncology, and pediatrics. It is designed as an educational program for practicing physicians, residents, and fellows in the specialties mentioned above. The curriculum has been designed to encourage the exchange of information with a combined format of lecture presentations from nationally prominent speakers. To enhance the objectives, time will be given for audience participation.

Lecture Objectives

- Discuss socio-economical and medical impact of proposed health care reforms on our population.
- Classification of Hypertensive Urgencies and Emergencies
- Review updates on Alzheimer's disease
- Definition of Osteoarthritis and Rheumatoid Arthritis. Impact in the community.
- Learn about the concept of the difficult patient in the context of outpatient clinic.
- Understand why Diabetic Control is so hard to attain

At the conclusion of this course, participants will

- Have learned the fundamentals of the proposed health care reforms; the pros and cons
 - Understand Osteoarthritis and Rheumatoid Arthritis as it affects our community
Identification, management.
 - Have current information about the genetics and treatment of Alzheimer
 - Understand current classification, management of Hypertensive Urgencies and Emergencies.
 - Learn the approach to an uncontrolled diabetic in the context of patient, family, and community
 - Identification and approach to the difficult patient.
-
